

INCREASE YOUR PAYMENT PROCESSING SECURITY TODAY WITH EMV

PROTECT YOUR RESTAURANT'S PAYMENT PROCESSING

We understand. You've got a lot on your plate. You don't need another worry, but if you don't protect your restaurant's payment processing, you could lose, big-time. And, you could be liable for fraudulent credit card chargebacks.

01

Thrive has teamed up with Worldpay, a leading secure payment solution provider, to make contactless EMV with QuickChip technology that supports NFC payments including Apple Pay & Google Pay, available to all of our customers. EMV is the global standard for credit card fraud prevention.

02

In addition to providing security at the restaurant terminal, your online and mobile app payments can also have advanced security with CVV (card verification value) and AVS (address verification systems) mismatch to safeguard your credit card sales.

03

Payment Card Industry (PCI) compliant technology controls access to cardholder data, monitors your system, and provides additional protection for online and in-person credit card transactions.

To learn more about Thrive's advanced POS system with encrypted swipe protection, inventory tracking, management tools, mobile ordering, and more, call 817-750-3947 today, or contact your Thrive Representative for more information on the security of EMV payments through Worldpay.
