PIZZA POINT-OF-SALE

### Your Floor Plan At Your Fingertips

Thrive Point-of-Sale's visual floor plan layout is easy to design and gives you the power to make changes on the fly just by dragging tables. Choose from multiple graphical styles and backgrounds, customize your colors, and even add fun elements like pool tables and video games. Set up multiple dining areas, bar areas, party rooms or patios, and activate these rooms by time, day or station. Thrive POS even has an alert to remind your staff to check the restroom for cleanliness periodically.

*Keep servers in friendly competition with instant color-coded stats that let them know where they stand compared to their peers on the floor today!*

### Mobilize Your Staff

With a POS iPad in hand, your servers can spend more time on the floor with your guests and less time waiting for an order entry terminal. Thrive POS has a flexible menu layout and easy order entry features to guide servers through accurate order taking. Requirements, modifiers, combo meals, daily specials, happy hour pricing and other automated specials are simple to manage and use. From brew pubs to pizzerias, family restaurants to BBQ, Thrive Point-of-Sale helps servers take care of customers.

*Thrive's drag and drop split check feature is incredibly simple to use. Unlimited checks make even large party splits easy to manage!*

### An Eye On The Customer

Visual alerts help keep your team on top of service for all your guests. From seated to served to settled to cleared, you can see at a glance if any customers are waiting too long for attention. Customers waiting too long for their first round of drinks will be a thing of the past.
